Anne ,

The Federal OSHA Directorate of Information Technology (DIT) has a quote with Dell on a specific model/configuration. This configuration is required in order to operate and receive support from DIT since it will be connected to the OSHANet. OSHA's image is also pre-loaded on the laptop with all the applications and security software that is required to connect a computer to OSHANet. No other configuration will be supported or would be allowed to connect to the agency network.
